Call for Tutorials and Panels Discussions

Tutorials and panel discussions will complement the core of the BPM 2011 conference. Tutorials will provide the opportunity to introduce one selected topic and to discuss related trends and challenges. Panel discussions will allow open conversations on controversial topics or trends.

We encourage tutorials and panels that fall within the topics listed in the BPM 2011 call for papers[^1] as well as tutorials and panels on emerging aspects of BPM or topics that expand the horizon of the conference.

We are soliciting proposals for 3-hours tutorials and 1.5-hour panels.

Proposals for tutorials should include: title, abstract (1-2 pages), intended audience, outline, name, affiliation and brief biography of each presenter. In addition, existing slides for the tutorial may be attached to the tutorial proposal.

Proposals for panels should include: title, abstract (1-2 pages), name, affiliation and brief biography of the moderator, and a list of potential panelists. The panel’s abstract should emphasize the controversial issues that might be discussed during the panel.

Proposals should be submitted in electronic form (plain text or PDF) by e-mail sent to the Tutorial/Panel Chairs.

Important Dates

- Tutorial proposal submissions: Sunday, May 15th 2011
- Notification of acceptance: Friday, May 27th 2011

Panels/Tutorial Co-Chairs

Fabio Casati University of Trento, Trento, Italy
Marlon Dumas University of Tartu, Tartu, Estonia
Stefan Tai Karlsruhe Institute of Technology, Karlsruhe, Germany
